

VIVO | H10 |

New state of the art digital piano series

NATURALNESS WHILE PERFORMING

Thanks to the exclusive Hybrid Wood Keyboard with gradual weighing, "ivory-ebony feel finish", 3 contacts, escapements and it is calibrated key by key!

A REALISM NEVER LISTENED BEFORE

"staccato resonances", "sympathetic resonances", "hammer noise", "88 resonances" of the strings when the Damper pedal is pressed... All aspects of the acoustic piano are reproduced thanks to the innovative "True To Life (T2L)" technology.

256 TIMES GREATER DYNAMICS

One is fascinated by the powerful dynamic excursion never heard before in a digital instrument. From the real "pianissimo" to the "fortissimo" thanks to the 24 bits linear and 48KHz; a definition 256 times greater compared to all other products working at 16 bits and 44.1 KHz.

NEVER MISS A NOTE

With DEXIBELL's unlimited polyphony you can play at 4 hands, with the Damper pedal pressed, using all the notes you need.

ALWAYS NEW

Enjoy the Italian Grand Piano and the US Grand Piano in the beauty of their Platinum version together with other 123 high quality sounds. With the simple use of a USB pen drive, you can load new sounds or change them all never losing the factory ones. The free downloadable library sound (on dexibell.com) can be loaded into the internal memory of 3.2 GB. Your VIVO is always up to date.

LET YOURSELF BE AMAZED BY THE SOUND

Thanks to a bi-amplification system with 8 loudspeakers, 6 of which assigned to the "near field" function, you have a very defined and very high quality listening; the best you can find to simulate the tone of a real acoustic piano.

DEXIBELL

VIVO H10 Specifications

| | |
|-------------------|---|
| KEYBOARD | Hybrid Wood 88 Keys – Graded Weight, Hammer action, Triple contact, Ivory & Ebony feels, Escapement |
| TONE GENERATOR | T2L – Sampling & Modeling |
| SAMPLING | XXL size over 15 sec. loop-less wave |
| SOUND WAVE FORMAT | 24 bit linear – 48 KHz |
